1.0	General
	<p>For the circuits, descriptions and tables indicated no responsibility is assumed as far as patents or other rights of third parties are concerned. The information in the Technical Descriptions describes the type of the boards and shall not be considered as assured characteristics. The reproduction, transmission or use of this document or its contents is not permitted without express written authority. Offenders will be liable for damages. All rights, including rights created by patent grant or registration of a utility model or design, are reserved.</p>

1.0	Warranty
	<p>Each board is carefully and thoroughly tested before being shipped. If, however, problems should occur during the operation, please check your user specific settings of all boards included in your system. This is often the source of the fault. If a board is defective, it can be sent to your supplier for repair. Please take care of the following steps:</p> <ul style="list-style-type: none"> - The board returned should correspond to the factory default settings since a test is only possible under these settings. - In order to repair your board as fast as possible , we require some additional information from you. Please fill out the attached Repair Form and include it with the defective board. - If possible, the board will be upgraded to the latest version without additional cost. - Upon receipt of the board, please be aware that your user specific settings were changes during the test. <p>Within the guarantee, the repair is free as long as the guarantee conditions were kept. If no fault has been found, you will be charged with the test cost due to the high test expenditure. Repairs outside of the guarantee will be charged.</p> <p>This Kontron Embedded Modules GmbH product is warranted against defects in material and workmanship for our guaranteed warranty period from the date of shipment. During the warranty period, Kontron Embedded Modules GmbH will, at its option, either repair or replace products which prove to be defective.</p> <p>For warranty service or repair, the product must be returned to a service facility designated by Kontron Embedded Modules GmbH.</p> <p>The foregoing warranty shall not apply to defects resulting from improper or inadequate maintenance or handling by buyer, unauthorized modification or misuse, operation outside of the environmental specifications for the product, or improper installation or maintenance.</p> <p>Kontron Embedded Modules GmbH will not be responsible for any defects or damages due to a faulty Kontron Embedded Modules GmbH product other than the products supplied by Kontron Embedded Modules GmbH.</p>

1.1	Introduction
	<p>The CRTtoLCD-5 is a highly integrated TFT panel interface controller, which allows an easy adaptation of standard video input sources like DVI or analog RGB to a digital TFT panel. The CRTtoLCD-5 need only one single 12V DC power supply and incorporates all needed functionality to build up a full featured TFT monitor. The card generates the necessary power sequencing for the flat screen. The highly flexible architecture of the CRTtoLCD-5 panel interface allows adapting nearly any available TFT panel. Therefore a variety of panel adapters and programming are available on request.</p>
1.2	Technical Information Summary
	<p>Features</p> <ul style="list-style-type: none"> - Zoom (from VGA) and shrink (from UXGA) scaling - Integrated 8-bit triple-channel ADC / PLL - Integrated Ultra-Reliable DVI™ 1.0 compliant receiver - embedded Microcontroller with serial ROM Interface - On-chip versatile OSD engine - All system clocks synthesized from a single external crystal - Programmable gamma correction (CLUT) - RealColor control provide sRGB compliance - Adjustable back light intensity control - Light sensor input - Independent Panel Power supply - Low EMI and power saving features <p>High-Quality Advanced Scaling</p> <ul style="list-style-type: none"> - Fully programmable zoom ratios - High quality shrink capability from UXGA resolution - RealRecovery function provides full color recovery image for refresh rates higher than those supported by the LCD panel - Moiré cancellation <p>Analog RGB Input Port</p> <ul style="list-style-type: none"> - Supports up to SXGA at 75Hz / UXGA 60 Hz <p>Auto-Configuration / Auto-Detection</p> <ul style="list-style-type: none"> - Phase and image positioning - Input format detection - Compatibility with all graphic cards and standard VESA modes <p>Ultra-Reliable DVI Compliant Input Port</p> <ul style="list-style-type: none"> - Operating up to 165 MHz (up to UXGA 60 Hz) - Direct connect to all DVI compliant digital transmitters

1.2	Technical Information Summary
	<p>RealColor Technology</p> <ul style="list-style-type: none"> - Digital brightness and contrast controls - TV color controls including hue and saturation control - Flesh tone adjustment - Full color matrix allows end users to experience the same color as viewed on CRTs and other displays (e.g. sRGB compliance) <p>LVDS Output Format</p> <ul style="list-style-type: none"> - Single / double channel up to SXGA 75 Hz output - Support for 8 or 6-bit panels (with high quality dithering) - One or two pixel output format <p>TTL Output Format</p> <ul style="list-style-type: none"> - Digital RGB panel 18-Bit interface <p>On-chip OSD Controller</p> <ul style="list-style-type: none"> - On-chip RAM for downloadable menus - 1,2 and 4-Bit per pixel character cells - Horizontal and vertical stretch of OSD menus - Blinking, transparency and blending - Proportional fonts <p>Display Interface Features :</p> <ul style="list-style-type: none"> - Control signal generation for backlight inverter - backlight dimming support - voltage generation and power sequence control for panel - Flat screens can be used with either 3.3V, 5V or 12V. - Digital RGB panel 18-Bit interface (optional) - LVDS panel interface (one and double port up to 24 Bit) <p>Operating Features :</p> <ul style="list-style-type: none"> - 5 or 6 (optional) button user interface - On Screen Display (OSD) control for full features - Full multi sync capable - VESA DPMS and DDC2B support - Single voltage supply (+12V DC) - No software drivers needed!

1.3	Connectors		
1.3.1	RGB analog input	CN2	
1.3.2	OSD keypad connector	CN500 or CN501 *Note1	
1.3.3	Backlight connector	CN101, CN102 *Note1	
1.3.4	Serial Port connector	CN200	
1.3.5	KAB-FLEX32 Interface	CN400 *Note1	
1.3.6	KAB-JILI30-Interface	CN100 *Note1	
1.3.7	DC Power supply	CN300, CN301	
1.3.8	Flatpanel power supply configuration	JP102	
1.3.9	Backlight control configuration	JP100, JP101	
1.3.10	ADC Input connector	CN201	
1.3.11	DVI input connector	CN1	

***Note1** can vary. Depends on version of CRTtoLCD-5

1.3.1		RGB Analog Input CN2		
High Density Sub-D-Connector 15 Contacts, Receptacle				
Case/Size : Right Angle, Through Hole				
	Name	Pin		Description
	RED	1	0	analog input red
	GREEN	2	0	analog input green
	BLUE	3	0	analog input blue
	NC	4	0	Not connected
	GND	5	0	Analog Ground
	GND	6	0	Analog Ground red
	GND	7	0	Analog Ground green
	GND	8	0	Analog Ground blue
	DDC+5V	9	0	Supply Voltage for DDC
	GND	10	0	Analog Ground
	NC	11	0	Not connected
	DDC_SDA	12	0	DDC serial data
	HSYNC	13	0	Horizontal sync input
	VSYNC	14	0	Vertical sync input
	DDC_SCL	15	0	DDC serial clock

1.3.2		OSD Keypad Connector CN501			
14 Contacts IDC Connector, Gold plated, double row, vertical mount, through hole

1.4	On Screen Display
	<p>With the OSD (On Screen Display) you can modify the settings and control the special features of the CRTtoLCD-5. The OSD uses a number of menus for making changes and turning the special features on or off. The configuration can be done via the OSD-keypad (OSD-Panel-Kit). To start the OSD press the "OSD" button on the keypad, after switching the power supply on. If a valid flat panel configuration is installed, the OSD Main Menu will be displayed.</p> <p>To select an tab, simply use the button "UP" or "DOWN" to move the cursor to the tab you want and press button "OSD". When you use the tab "Exit" and press the "CONFIRM"-button, the OSD will be closed.</p> <p>To use a tab menu, simply use "OSD"-button to select the field. Use "UP" or "DOWN" to select a value for that field. The "Exit"-field on the bottom-side on the tab will go up to the tab-selection. Simply press the "OSD"-button.</p>

Note: All changed values will only be saved by selecting "Exit" from the OSD. If not, the adjusted values will be lost after loss of power.

Input Select

Feature	Button	Description
Select VGA	Press "Osd"	Select VGA input
Select DVI	Press "Osd"	Select DVI input
Exit	Press "Osd"	Exit menu

Brightness

Feature	Button	Description
Brightness	Press "Osd" to enter Adjust with "Up" and "Down"	Adjust brightness
Contrast	Press "Osd" to enter Adjust with "Up" and "Down"	Adjust contrast
Backlight Brightness	Press "Osd" to enter Adjust with "Up" and "Down"	Adjust backlight brightness
Backlight Mode	Use "Up" and "Down"	Enter Backlight Mode submenu
- Manual Backlight	Use "Up" and "Down"	Control backlight over the OSD
- External Backlight Control	Use "Up" and "Down"	Enable external control of backlight
- Exit		Exit submenu
Exit	Press "Osd"	Exit menu

Color Settings

Feature	Button	Description
Auto Color Adjust	Press "Osd"	Adjust colors automatically
Switch sRGB Mode	Press "Osd"	Switch to sRGB mode
Color Temperature	Press "Osd"	Enter Color Temperature submenu
- Select Color Temperature	Press "Osd"	Select predefined color temperatures
- Adjust RGB Values	Press "Osd"	Enter Adjust RGB Values submenu
- Red Color Value	Use "Up" and "Down"	User defined value of color temperature
- Green Color Value	Use "Up" and "Down"	User defined value of color temperature
- Blue Color Value	Use "Up" and "Down"	User defined value of color temperature
- 4200K	Press "Osd"	Set predefined color temperature of 4200K
- 5000K	Press "Osd"	Set predefined color temperature of 5000K
- 6500K	Press "Osd"	Set predefined color temperature of 6500K
- 7500K	Press "Osd"	Set predefined color temperature of 7500K
- 9300K	Press "Osd"	Set predefined color temperature of 9300K
- Exit	Press "Osd"	Exit submenu
Exit	Press "Osd"	Exit menu

Image Settings

Feature	Button	Description
Auto Adjust	Press "Osd"	Adjust image automatically
Adjust Width	Press "Osd" to enter Adjust with "Up" and "Down"	Adjust image width
Adjust Phase	Press "Osd" to enter Adjust with "Up" and "Down"	Adjust image phase
Horizontal Pos	Press "Osd" to enter Adjust with "Up" and "Down"	Adjust image horizontal position
Vertical Pos	Press "Osd" to enter Adjust with "Up" and "Down"	Adjust image vertical position
Exit	Press "Osd"	Exit menu

Tools

Feature	Button	Description
OSD Settings	Press "Osd"	Enter OSD Settings submenu
- OSD Timeout	Use "Up" and "Down"	Set the OSD time to close automatically
- OSD Hor. Position	Use "Up" and "Down"	Set OSD horizontal position
- OSD Ver. Position	Use "Up" and "Down"	Set OSD vertical position
- OSD Orientation	Press "Osd"	Enter OSD Orientation submenu
- Standard	Press "Osd"	OSD standard orientation
- Rotate 90	Press "Osd"	Set OSD orientation at 90 degrees
- Rotate 180	Press "Osd"	Set OSD orientation at 180 degrees
- Rotate 270	Press "Osd"	Set OSD orientation at 270 degrees
- Horizontal Mirror	Press "Osd"	View the OSD horizontally mirrored
- Exit		Exit submenu
Factory Reset	Press "Osd"	Recall all default factory settings
Factory Color Reset	Press "Osd"	Recall the factory default color settings
Factory Position Reset	Press "Osd"	Recall the factory default position of screen
Sharpness	Use "Up" and "Down"	Adjust level of sharpness
Overlapped Mode Select	Press "Osd"	Select overlapped mode
Exit	Press "Osd"	Exit menu

Feature	Button	Description
Exit	Press "Osd"	Exit the OSD and save changes

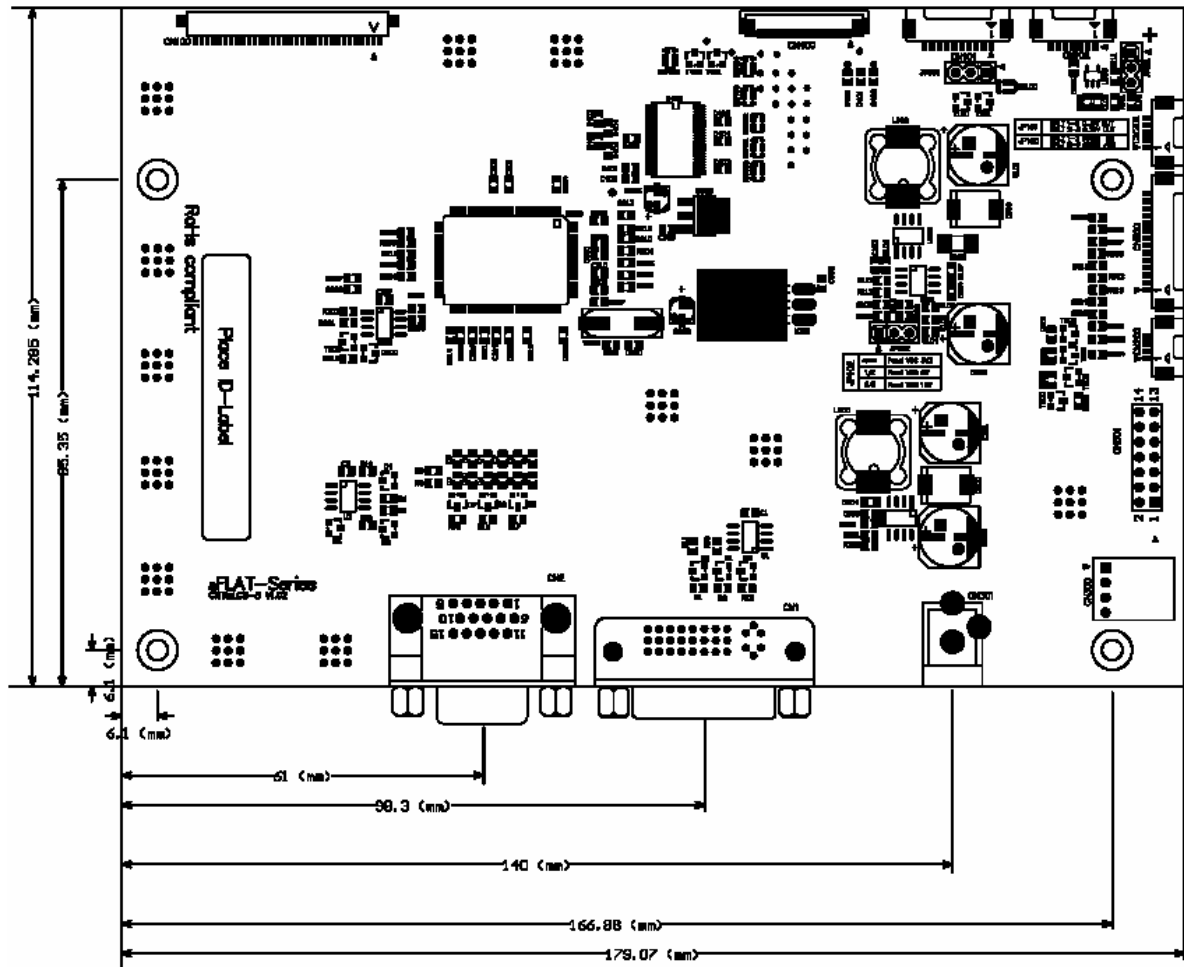

1.5	Technical Specification
	<p>These values were measured with OSD-Panel attached and without flatpanel and backlight inverter.</p> <p>- Supply voltage at 25°C without load:</p> <p>Minimum supply voltage : + 11,4 V DC Typical supply voltage : + 12,0 V DC Absolute Maximum supply voltage : + 12.6 V DC</p> <p>- Typical Input current at 25°C without load:</p> <p>CRTtoLCD-5 with input signal (XGA) : 250 mA CRTtoLCD-5 with power down typical : 60 mA</p> <p>- Input Supply voltage ripple : typical 100 mV peak to peak 0 – 20 MHz</p> <p>- Current Rating of Flatpanel Power supply:</p> <p>PANEL VCC Steady State 3V / 5V and 12V @ +5% : 3A PANEL VCC 5sec. -5% 3V3 @4,33A PANEL VCC 5sec. -5% 5V @ 4,15A PANEL VCC 5sec. -2% 12V @ 4A Note: Output power without any switch or short circuit breaker</p> <p>- Slewrate of Flatpanel Power supply with 3A load</p> <p>PANEL VCC 3V3 302us PANEL VCC 5V 408us PANEL VCC 12V 1.7ms</p> <p>- Voltage and Current Rating of Backlight Power supply:</p> <p>Direct +12V Output voltage without any switch or short circuit breaker CN400: Maximum output current 4A CN401: Maximum output current 2A There are no limitations between Backlight Power and Flatpanel Power The only limitation is the capability of the DC Input Power supply</p> <p>VGA connector signals : Sync input voltage low : 0.8 V Sync input voltage high : 2.4 V RGB input voltage : 0 – 0.7 V with 75 Ohm external termination RGB input current : 0 – 5 mA</p> <p>- Temperature : ambient : 0° C – 60° C (*1) Non operating : - 10° C – 85° C (*1) The maximum temperature on the module surface can exceed above mentioned ambient temperature. It is the user responsibility to keep this temperature within the above specification.</p> <p>- Thermal gradient : operating : 25° C per hour non-operating : 40° C per hour</p> <p>- Relative Humidity : operating : 10% - 90 % RH non-condensing non operating : 5% - 95% RH non-condensing</p>

1.5	Technical Specification
	<p>- Mechanical : Shock : 50G/20ms square wave maximum Vibration : 1G/0-600Hz, dwell not to exceed</p> <p>- Altitude : operating : 0 – 3000 m non-operating : 0 – 5000 m</p> <p>- Dimensions of the printed circuit board :</p> <p style="padding-left: 40px;">Width : 114.28 mm Length : 179.07 mm Thickness : 1.50 mm</p> <p>- Dimensions of the module :</p> <p style="padding-left: 40px;">Width : 119.50 mm Length : 179.07 mm Height : 16.50 mm +2mm (*)</p> <p>Note : The dimension of the module can change if cable, Adapter or Keypad plugged in!</p>

1.6 Supported Video Modes (Analog Input)		
Generally all VESA compatible video modes are supported. If modes are not supported the controller displays "Invalid Mode" on the flat panel. In this case use the Flat Panel Editor, available on request, to add this special mode to the supported mode table.		
Following modes are tested		
Video Mode Input	Vertical refresh rate	Mode standard
720 x 400	70 Hz	DOS
640 x 350	70 Hz	DOS
640 x 400	70 Hz	DOS
640 x 480	59,9 Hz	VGA
640 x 480	60 Hz	VGA
640 x 480	72 Hz	VGA
640 x 480	72,8 Hz	VGA
640 x 480	75 Hz	VGA
800 x 600	56,25 Hz	SVGA
800 x 600	60 Hz	SVGA
800 x 600	70 Hz	SVGA
800 x 600	72 Hz	SVGA
800 x 600	75 Hz	SVGA
1024 x 768	60 Hz	XGA
1024 x 768	70 Hz	XGA
1024 x 768	72 Hz	XGA
1024 x 768	75 Hz	XGA
1152 x 864	60 Hz	
1152 x 864	70 Hz	
1152 x 864	75 Hz	
1280 x 1024	60 Hz	SXGA
1280 x 1024	70 Hz	SXGA
1280 x 1024	75 Hz	SXGA
1600 x 1200	60 Hz	UXGA

1.6 Supported Video Modes (DVI Input)		
Generally all VESA compatible video modes are supported. If modes are not supported the controller displays "Invalid Mode" on the flat panel. In this case use the Flat Panel Editor, available on request, to add this special mode to the supported mode table.		
Following modes are tested		
Video Mode Input	Vertical refresh rate	Mode standard
640 x 480	60 Hz	VGA
800 x 600	60 Hz	SVGA
1024 x 768	60 Hz	XGA
1280 x 1024	60 Hz	SXGA
